

Empower productivity with smart document capture.

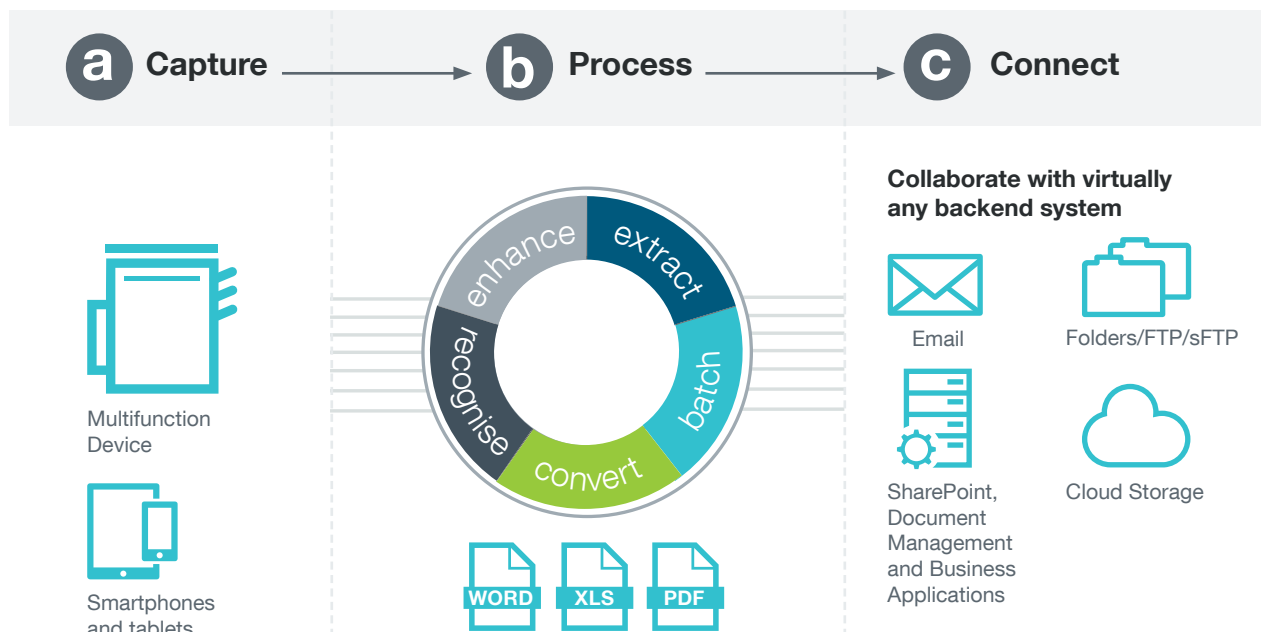

Nuance eCopy ShareScan®

Eliminate document bottlenecks. Improve your bottom line.

Even as organisations move toward electronic transactions, documents are often printed, annotated, copied and communicated via PDF and paper documents. Paper-based information is hard to manage and expensive. PDF documents are inflexible and difficult to edit without the right tools. Inefficient document handling can slow your business down and prevent you from closing sales, solving a customer problem or getting products out the door. Those bottlenecks cost your organisation money and waste time. It may even be costing you customers.

You have access to mobile devices with high-resolution cameras and powerful multi-function devices (MFDs) that can scan paper documents reliably at high speed and turn them into documents that you can share. But can you scan them or take pictures of them and then route them, secure them and share them with the right people in the right places at the touch of one button?

There is a new movement afoot with the rise of “learning workers”. Learning workers are far more valuable to an organisation because they adapt with the changing workplace. They’re mobile, think for themselves, easily learn how to use new tools to help them work faster, collaborate and aren’t afraid to independently adjust business processes to be most effective. They need to work anywhere and have information available everywhere. Digitisation of documents is the name of the game. Are you giving your learning workers everything they need so your organisation can reap the benefits?

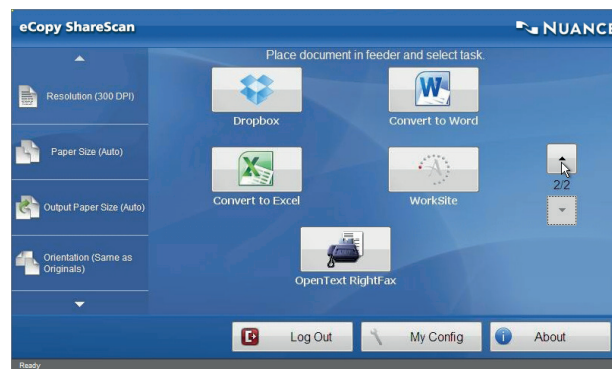

eCopy ShareScan makes processing documents easy and automates your important workflows, making complex tasks simple.

One button gets documents onto your business information highway.

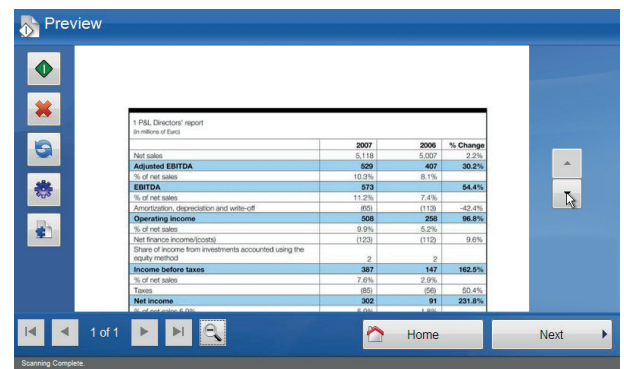

Now your employees can quickly on-ramp documents to all of their favourite destinations with the push of a button. eCopy ShareScan features the easiest way to get fast, error-free documents scanned and converted to formats that make your business run smoothly. You can scan multiple documents into a single document right at the MFD.

With eCopy ShareScan you get the best experience possible with an optional document preview on the screen, type-ahead lookups, and the rapPID™ “remember me” feature that makes it even easier to scan documents over and over again with the same settings.

Speed things up with eCopy ShareScan's easy-to-use workflow buttons

Use eCopy ShareScan's preview feature to help avoid wasteful errors

Nothing works better with Microsoft Office 365 than eCopy ShareScan.

When you log-on to your computer on a Microsoft network, your PC desktop looks the way you set it and you are connected to all the systems you need to access to get work done. It's familiar because it's your workspace. eCopy ShareScan works exactly the same way on the MFD. It's the ultimate document workflow solution for Microsoft Office 365 because it integrates seamlessly with Microsoft Active Directory Services for secure login and personalised workflows.

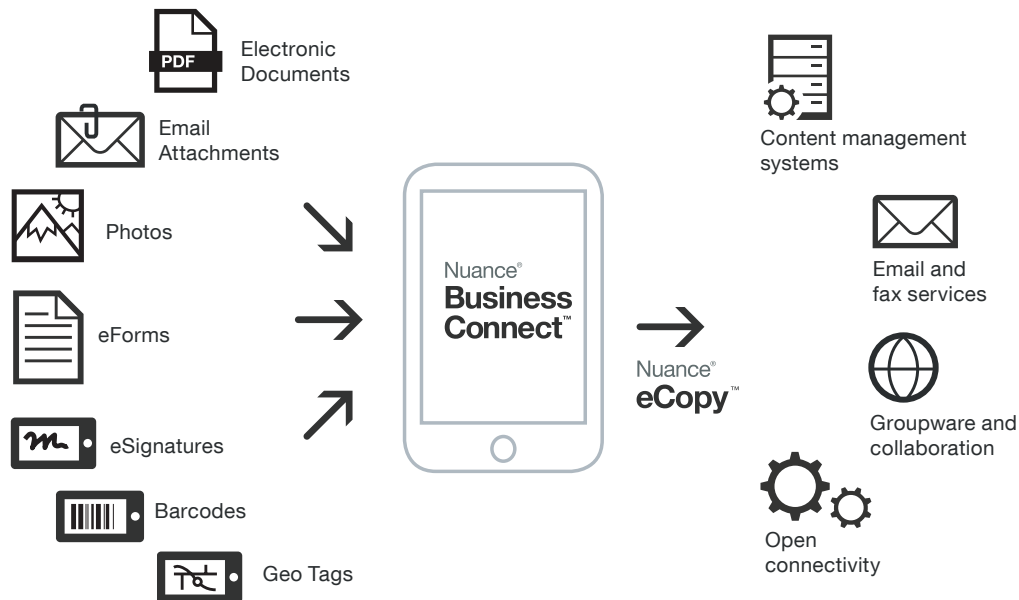

Extend the use of mobile devices. Enabling “learning workers” anytime, anywhere.

eCopy ShareScan integrates with the optional Nuance Business Connect mobile application. The same workflows that appear on your MFD can now be extended to mobile devices to capture documents to the same destinations with familiar eCopy workflow buttons.

But Nuance Business Connect is much more than that. With the added ability to capture documents with the mobile camera, add data with form overlay capabilities and have customers sign documents immediately, you can increase staff productivity and customer satisfaction. This makes your mobile workforce more productive and allows them to perform critical tasks from their mobile device on the go.

The easiest to set up and configure. Versatility and power at everyone’s fingertips.

Nuance eCopy ShareScan dramatically improves the versatility of multifunction devices and the mobility of document capture. No other network document capture solution can be installed and configured faster so you can be up and running in a matter of minutes. Employees and department managers can create personalised workflow buttons for scanning to specific folders as they are created, in real time, with no need to involve IT or network administrators. Workflow buttons can be shared and members of the group can be expanded or removed as required. ShareScan does all this while preserving security, scalability and high availability as core strengths. In short, eCopy ShareScan streamlines and secures document-centric business processes through the science of simplicity.

Share and collaborate.

With the push of a button, eCopy ShareScan connects the user experience at the MFD with the most popular directory, email, fax and collaboration systems.

These connectors give users access to the features they need to make sure documents are moved into electronic workflows instantly, saving time to get transactions processed and documents delivered, or to share content among teams.

- Microsoft Exchange
- Microsoft SharePoint
- Microsoft SharePoint Advanced

The best way to scan to PDF. Do more with documents at your PC desktop.

With scanning, the destination is often where the journey begins. According to InfoTrends, over 50% of companies are reporting scanning to PC desktops from MFDs. Why? Because collaboration starts with making changes to documents, adding comments, additional pages or content and more. eCopy ShareScan, as part of a total solution, addresses these challenges in two ways.

First, eCopy ShareScan turns paper documents into the best PDF versions of those documents so sharing, searching and collaborating is easy and accurate. eCopy ShareScan uses the highest OCR accuracy possible to recognise all the words in your scanned document and adds them to your PDF file. Now that PDF becomes searchable to desktop PDF applications, Microsoft Windows desktop search and your document management systems.

Second, eCopy ShareScan Elements Office and Suite come with eCopy PDF Pro Office, a powerful PDF editor for Windows PCs that is optimised for business professionals who need to edit any kind of PDF document. eCopy PDF Pro Office integrates with the MFD using a unique inbox that puts scanned content – from the MFD down the hall – just a mouse click away in the system tray on the user's desktop.

A complete PDF solution for business

eCopy PDF Pro Office lets you create 100% industry-standard PDF files directly from any PC application that can print.

You can effectively share ideas with a comprehensive set of annotation, stamping, redaction and drawing tools. Combine files and remove or replace pages. Select pages from a source document – Word, Excel, PowerPoint, WordPerfect, XPS, JPG, BMP or TIF – to insert into a target PDF document.

Collect information using FormTyper to automatically convert non-fillable forms into fillable PDF forms that you can complete, save and email.

Perform intelligent searches leveraging a Looks-Like-Search feature and advanced information identification options to find what you need.

Ensure document security – eCopy PDF Pro Office is the perfect counterpart to your eCopy ShareScan enabled MFDs or for any office worker that needs to work with PDF documents, all at a surprisingly affordable price.

Choose the eCopy ShareScan solution that is right for you.

eCopy ShareScan offers all the functionality your organisation requires, but Nuance recognises that one size does not fit all. Ask your office equipment dealer or MFD manufacturer sales person to engage a Nuance sales representative on how they can develop a customised solution plan for your organisation.

Don't need all the bells and whistles?

With eCopy ShareScan you don't have to pay for what you don't use.

Want to walk before you run?

eCopy ShareScan can be extended with modules to connect and automate more.

Have more than one MFD, each with different user requirements?

eCopy ShareScan editions can be mixed and matched in a single installation for optimum advantage. All eCopy ShareScan editions are built around the same core engine and managed through the same console.

Worried about getting trapped by a wrong choice?

With eCopy ShareScan, there are no bad choices. You can buy what you need now – like a better way to do scan-to-email – and then upgrade by purchasing options that add onto what you already have. There is no reinstalling software. Just turn on the feature with a new licence key.

Nuance offers eCopy ShareScan in 5 product editions.

Designed to run inside a supported smart MFD:

- **eCopy ShareScan Elements:** Improves on critical business collaboration processes like scanning to email, shared folders, home folders, and sending to your PC desktop.
- **eCopy ShareScan Office:** Does everything Elements can do, plus any one of our additional destination connectors for document management systems such as Microsoft SharePoint or Cloud repositories.
- **eCopy ShareScan Suite:** All the functionality options eCopy ShareScan Elements has to offer, plus any three of our additional destination connectors for document management systems such as Microsoft SharePoint or Cloud repositories. Additionally, you get critical business processing capabilities including Barcode Processing, Form Processing and Bates Stamping.
- **eCopy ShareScan Enterprise:** High scalability and high automation document capture workflow platform. Includes all Nuance eCopy connectors and extenders in a single, low cost licence for deployments with 50 or more MFDs.

Designed to attach to virtually any MFD or scanner:

- **eCopy ScanStation:** This free-standing kiosk turns any MFD or scanner into a full-service scanning automation station.

Attach eCopy to almost any MFD or scanner. You have options.

The eCopy ScanStation kiosk provides a dedicated PC with a customised stand, touchscreen and full-sized keyboard that attaches to almost any scanner or MFD. The screen is so large and bright, the keyboard so fast and pleasant to type on, that even if your smart MFD supports the eCopy ShareScan application, you may want this option instead! It greatly accelerates index-data entry, provides an outstanding preview experience and enhances connectivity to copiers, MFDs and scanners that don't support embedded applications.

The right solution for any sized customer. Deploy rapidly. Control completely. Expand infinitely.

eCopy ShareScan installs extremely fast – installing on your server in under 10 minutes. It's ideal for small businesses that have limited IT resources while still being powerful and scalable enough for the largest enterprise. eCopy ShareScan's centralised management console uses a simulator so you can build and experiment with connections and workflows without having to install an MFD. Once you know your configuration works, you can push it out to any number of licenced MFDs. This makes quick work of configuring, testing, securing and deploying scanning workflow profiles for all users and device groups – regardless of make and model.

eCopy ShareScan family comparison.

	1 Seat	5 Seats	10 Seats	10 Seats	Sold Separately
 Enterprise High scalability and high automation document capture workflow platform. Includes all Nuance eCopy connectors and extenders in a single, low cost licence for deployments with 50 or more MFDs.				—	
 ScanStation Adds a secure, accessible kiosk for network scanning applications that demand high security, accessibility or connectivity to MFDs and scanners.					
 Suite Adds document process automation workflows. Includes zonal form and barcode recognition routing.					
 Office Adds document management workflows. Includes integration with document management systems.
