

# MEET PRISMAprepare Go

## YOUR VIRTUAL PRE-PRODUCTION ASSISTANT

Changing customer demands. A huge variety of different jobs, in shorter print runs and delivered to tighter deadlines.

You're a small print producer, so you get the picture. You spend more and more time getting jobs ready for the press. Manually checking job data files. Logging and checking new orders – and repeat jobs. Preflighting. Which leaves little time to win new business, manage existing customer relationships and use your knowledge and expertise to add value.

You know that there's a better way. That cloud-based job submission and file preparation is the way forward. The trouble is, you think automation is complex and costly – in time and money – and not for you. Not yet, anyway.

### Think again.

Meet PRISMAprepare Go – the virtual pre-production assistant that enables small print producers to make the digital transition quickly and easily. With no up-front cost, no need for an IT genius to make it work, and no ongoing maintenance.

**Receive. Prepare. Go.**  
**What could be simpler?**

# DON'T WAIT TO AUTOMATE

**PRISMAprepare Go** is the simple, effective, secure and affordable route to cloud-based job submission and pre-production preparation for small in-house and commercial print producers.

From job submission to processing and production, PRISMAprepare Go enhances your customer offering with a highly-structured, professional service that's easy to configure and use, and very cost-effective.

Access PRISMAprepare Go remotely from multiple devices through PRISMA Home - the reliable, safe and secure hub for all PRISMA cloud-based applications and tools.

And because PRISMAprepare Go is SaaS (software as a service), you need only minimal, basic training before your own branded onboarding portal is up and running - in hours, not days or weeks.

With PRISMAprepare Go it's just three simple steps to a fast 'win-win' for you and your customers. Receive, Prepare, Go.

## Don't wait to automate!

To find out more about **PRISMAprepare Go** cloud-based job submission and production workflow, go to [www.canon-europe.com/prismapreparego](http://www.canon-europe.com/prismapreparego)

### Receive

PRISMAprepare Go makes it easy for your customers to work with you. Anytime, anywhere, they can send jobs by dragging-and-dropping single or multiple PDF files, adding any comments or special requests. Or your operators can submit jobs directly for customers. Once in production, real-time progress reports are a click away.

At your end, jobs enter your new, streamlined PRISMAprepare Go pre-production workflow - a simple, orderly way to receive and prepare jobs for production. Built-in automated preflighting flags up any missing elements - like page size, fonts, or image resolution.

### Prepare

PRISMAprepare Go lets your operators switch easily between applications, tools and printers. Create a variety of different products - documents with staples and/or punch holes, folded booklets, same-up and cut-and-stack sheets with full colour previews.

Use PRISMAprepare Go's 'What You See Is What You Get' Document and Sheet view to minimise mistakes by verifying page output formatting adjustments on-screen as they're made.

### Go

PRISMAprepare Go is a single submission point to your networked production presses. It supports most production printers with PRISMAsync, Fiery or Canon DFE controllers, as well as generic JDF-enabled production devices.

Prepare jobs based on the available finishing devices. Send jobs directly to PRISMAsync DocBoxes for easy reprints and fast last-minute edits. For extra functionality PRISMAsync Remote Manager can also run on the PRISMAprepare Go client workstation - and a single web browser is all you need to switch between PRISMAprepare Go and PRISMAsync Remote Manager.
