

# DEVICE CLEANING GUIDELINES

**1**  
Switch off the machine and disconnect the device from mains before cleaning.

**2**  
Use a soft cloth with alcohol based cleaner for disinfection. Wipe parts users touch.

**3**  
Surfaces must be dry before plugging in and powering back on.

**4**  
Never spray disinfectant directly onto the device, always use a cloth to prevent liquid entering the device causing damage.

**5**  
Depending on disinfectant used, the printer exterior may be discoloured, however, the printer functions will not be affected.

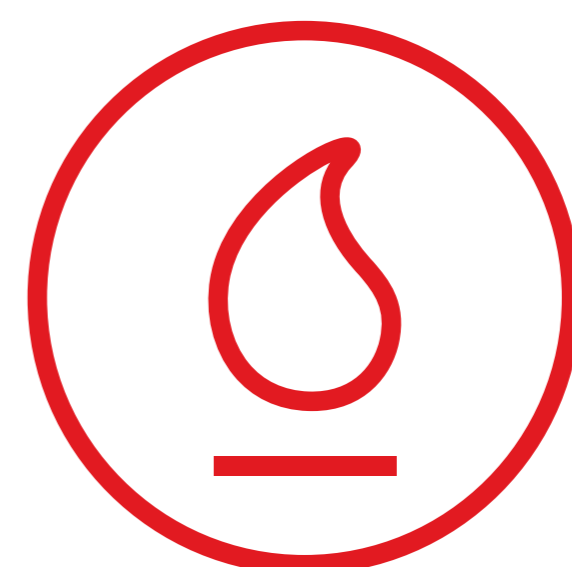

**6**  
Cleaning products such as wet wipes may contain non-alcoholic compositions and therefore, are not recommended for use.

**7**  
It is recommended to use a cleaner that contains a minimum of 60% alcohol.

**8**  
These cleaning guidelines do not guarantee effectiveness against coronavirus.

**9**  
Note that alcohol is a flammable liquid. Never use it near a fire.
