

**CANON
HYBRID
WORKSPACE SOLUTIONS**

Canon

More than ever, businesses are needing to empower their workforces to operate productively, collaboratively and work securely from anywhere.

Whether in the office, at home or on-the-go, businesses need to ensure their people are able to do their job effectively, from simple scanning and printing, through to performing complex workflows.

uniFLOW Online allows employees to seamlessly print and scan documents, whether they're working from the corporate office, their home office, or a combination of both.

The similar user experience and ease of operation of the **imageRUNNER ADVANCE DX** devices in the office, and the compact desktop **i-SENSYS X** and **imageRUNNER** devices at home, make for a smooth transition between the two work environments.

PRINTING

uniFLOW Online supports printing to large multifunction devices in the office as well as smaller, devices in the home. Plus, with Print via Cloud, users can print easily and quickly regardless of the network they're on.

When at home, a user can send a job to print, visit the office and release their print job securely at any office device. In an office or home environment a user can authenticate to release a job securely. Alternatively, this setting can be turned off for home workers.

SCANNING

Filing Assist functionality is designed to increase user productivity. It's easy to scan, name and learn documents, save to a destination and access when required.

In addition, Scan to popular Cloud destinations including Box, DropBox, Evernote[®], Google Drive[™], Microsoft OneDrive[®] and more.

TRACKING /REPORTING

With uniFLOW Online, the Company IT Manager can easily manage devices and user settings, both in an office or home location – as it's easily managed centrally via the Cloud.

Simple tracking and reporting tools allow for print profiles to be set and tracking of costs for users or departments.

CLOUD

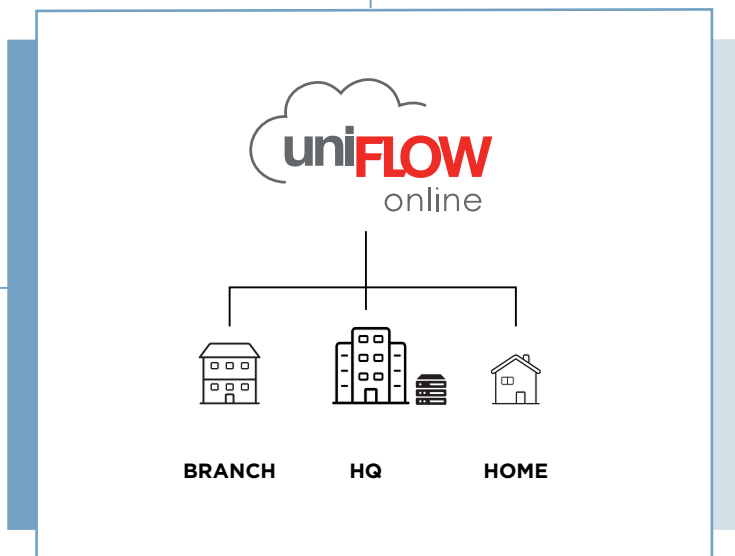

It's easy for the Company IT to connect uniFLOW Online to a home worker's Canon supported device – a uniFLOW Online subscription and an internet connection is all that is needed.

This gives the home worker the dual advantage of staying connected while having the flexibility to work from either their office or home. uniFLOW Online typically delivers 3 new releases a year that offer new or enhanced features as standard. So regardless of location, when uniFLOW Online is updated, so are all users! So very easy for IT to manage and set user functionality.

A SOLUTION TO MEET EVOLVING BUSINESS REQUIREMENTS.

As businesses shape their cloud strategy and adjust to the increase of hybrid work locations, they need solutions that give them flexibility and cost advantages.

uniFLOW Online, meets the evolving needs for home working, yet is also scalable and connection to a **uniFLOW Server** offers additional functionality, on-demand cloud resources and satisfies sophisticated security requirements and business process workflows.
