

# CaptureOnTouch Scan, Process, Convert and Share

CaptureOnTouch is a scan application that works with Canon imageFORMULA Document Scanners through their TWAIN driver. With a user friendly and easy operation, it offers a simple and intuitive scanning experience.

The multiple functionalities allow to scan to various destinations and formats and to create searchable and editable files.

# **BENEFITS**

**Easy Operation** an easy-to-use software with intuitive icon-based operation

Versatile file saving & sending options can create multiple file formats and easily scan to multiple destinations

**Powerful OCR processing** easily transform and convert documents into editable and searchable files

Flexible connectivity & integration made possible with optional plug-in SDK connector

## Intuitive scanning

This well-equipped application can reliably respond to users' needs of quickly scanning documents and images.

#### User-friendly panels and commands

CaptureOnTouch presents a very user-friendly appearance thanks to the self-explanatory icon-based panels and the commands that are conveniently placed to simplify operations and can be settled on the users' preference.

#### Two scanning methods

The software provides two scanning methods that can satisfy various needs and different Plug-ins to co-work with a variety of applications.

#### Image quality processing and functions

Thanks to its functions it can scan with optimal image quality, automatically organise a batch of documents and allows to create multiple files that can be stored, sent by email or uploaded to Cloud services.

A network of functions to generate optimal images, edit and securely organise

## Multiple outputs with a single scan

CaptureOnTouch can perform up to 3 outputs with a single scan and can create **multiple file formats** such as PDF, JPEG, TIFF, BMP, PDF/A, PNG, PowerPoint, Docx and XIsx\*.

It has different **Plug-ins** available that, once installed, will appear as panels in the home screen. The plug-ins included in the software provide connection to Clouds and EDM services such as Google Drive<sup>™</sup>, Microsoft SharePoint, OneDrive and Dropbox.

Also, users can install other plug-ins to scan to e-mail, print or bundled applications.

### **Flexible connectivity**

CaptureOnTouch can take the businesses further by easily integrating to **3**<sup>rd</sup> **party workflows** thanks to the plug-in Software Development Kit (SDK). The Canon Developer Programme allows to refine and adapt the imaging workflows and achieve unique solutions for the customers' requirements.

#### Create searchable and editable files

Users will be able to transform static content into smart, editable and searchable PDF thanks to the **Optical Character recognition** (OCR). This function allows to recognise and process texts from the scanned document, then extract and change data into binary. It also allows to edit, copy and paste from the PDF outputs, or to identify text table when saving the document to Office formats such as pptx, docx and xlsx.

The CaptureOnTouch Pro allows users to setup zonal OCR fields to send files as index data or use in file naming schema and can support up to **30 languages** and can recognise OCR-A and OCR-B fonts.

## **OTHER VERSIONS**

#### CaptureOnTouch Lite

This software is designed to offer maximum portability and convenience. It helps users to easily, quickly, and effortless connect with the devices to use basic functions with lowend scanners, without the need to install any drivers or application software. It simply requires for the user to move the scanner's Auto Start switch to ON position and connect it to a Windows or Mac PC to scan.

CaptureOnTouch Lite allows to register multiple scan modes and the plug-in module enable user to select various output destinations.

#### CaptureOnTouch Mobile

This version allows users to scan documents using iPad, iPhone and Android devices to operate with Canon imageFORMULA Wi-Fi capable or WA10/NA10 compatible document scanners.

It can help to save time thanks to double-sided scanning of documents in a single pass, and to create superior and professional image quality results with advanced image processing tools such as auto document size detection, deskew and blank page deletion.

It is downloadable from the Apple App Store and Google Play store.
