THE FUTURE OF PRINT? IT'S IN THE CLOUD

61%

More than half of organisations expect to manage printing fully or mostly in the cloud by 2025

Quocirca Print Industry Trends 2023

94%

of organisations use:

Microsoft 365

Google Workspace

That's why our workspace multifunction printer (MFP) portfolio is entirely cloud enabled, supporting higher productivity in a connected age.

MAXIFY

CLOUD SCAN AND PRINT BETTER HYBRID WORKING

Native cloud connectivity on our devices lets you easily print from and scan to cloud storage providers such as OneDrive, Dropbox or Google Drive.

Cloud Print allows you to send pages to print and then release the document from the cloud at any device, wherever you and your team are working.

With Scan to Cloud, you can scan documents directly to a cloud storage location to be processed, printed or archived as needed.

MAXIMISING YOUR TIME AND RESOURCE

Common print and scan behaviours in the workplace rarely make full use of devices' – and organisations' – cloud capabilities. That means productivity in many organisations isn't as high as it could be.

Do you recognise any of these behaviours in how you or your team print and scan?

88%

Out of 19 million scans on Canon MFPs in the EMEA region last year, 17 million were scan to email.

80%

of business information is contained within documents.

2HRS

Employees lose up to two hours a day searching for information.

69%

of employees store important documents in mail servers.

60%

of employees need remote/mobile access.

17

An average document exists in 17 separate copies.

65%

of employees print paper copies of documents to get them signed.

68%

of businesses use Microsoft Outlook for approval processes.

Collaboration and document sharing is limited to email.

76%

of employees keep local copies of documents.

We have a suite of tools to help you raise your productivity when printing and scanning – and improve your company's information security and compliance.

FIVE STEPS TO MORE PRODUCTIVE PRINTING AND SCANNING

PRINT FROM CLOUD

I want to send jobs to print from my PC, mobile or tablet, and collect from any location I choose.

KEY BENEFIT:	YOUR NEEDS:	DOCUMENT TYPES:	TYPICAL PRINT AND SCAN DEVICES:	MINIMUM SOLUTION REQUIRED: DEVICES:
Mobility 	Enabling seamless hybrid working with employees based in various locations – home, co-working spaces, mobile, or office.	General office documents, such as meeting notes, presentations, brochures, documents for signature	Home: Inkjet device Office: Canon imageRUNNER ADVANCE DX, imageRUNNER or i-SENSYS X	Cloud Connector

HOW IT WORKS:

1. Send pages to print from any location.
2. Authenticate at any device.
3. Release print job securely at home, office or co-working space connected to uniFLOW Online.

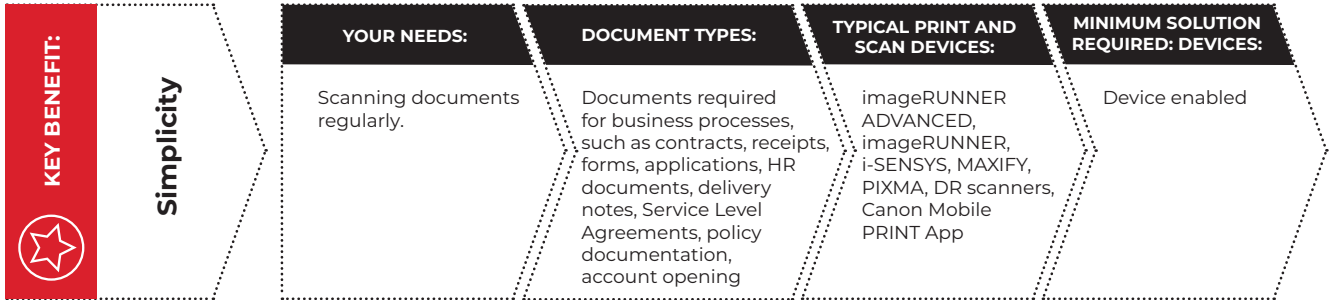

EMPLOYEE	IT TEAM	ORGANISATION
BENEFITS Easily access company documents to print in the office, home or co-working space. Send jobs to print and release print jobs at any uniFLOW Online location.	BENEFITS Enable employees to work effectively and securely. Maximise pre-existing investment in Microsoft 365 Suite or Google Workspace Suite, uniFLOW Online and Canon devices. Track, report and even reimburse home workers based on print levels.	BENEFITS Peace of mind that processes and workflows are in place to protect sensitive documents.
DISADVANTAGES Creates paper copies which impacts sustainability goals. 36% of businesses say they are reducing paper consumption for sustainability purposes – IDC Office Market Update July 2023.	DISADVANTAGES Control over device costs and usage levels is a priority, so IT teams need the best combination of devices, solutions and services to support the organisation.	DISADVANTAGES Manual copies containing potentially sensitive data are located in multiple places, posing a risk to information security and compliance.

User productivity rating: ***
 Security and governance rating: **

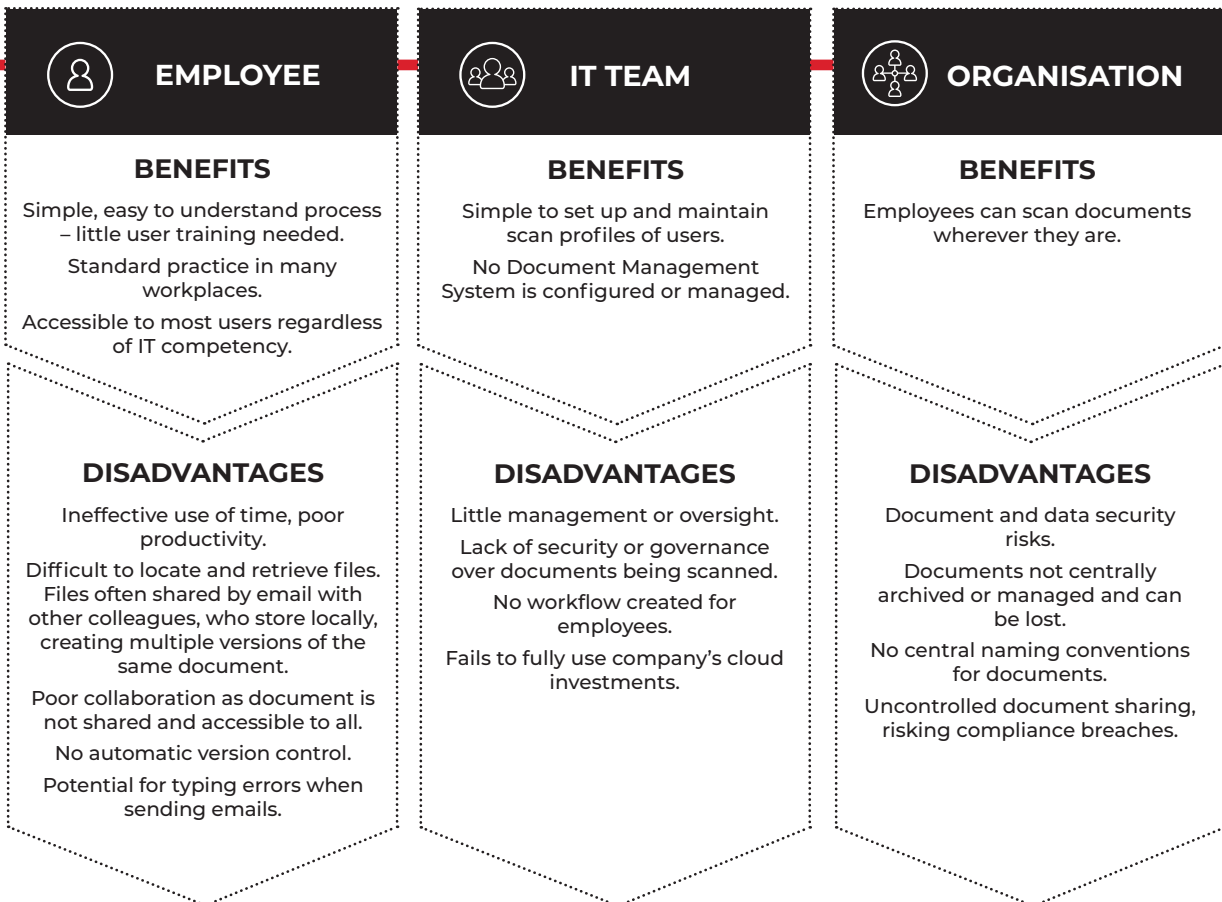

SCAN TO EMAIL

I want to scan a document and access it as an attachment in my email client, to share it with others, use it locally on my computer, or save to a central network storage location.

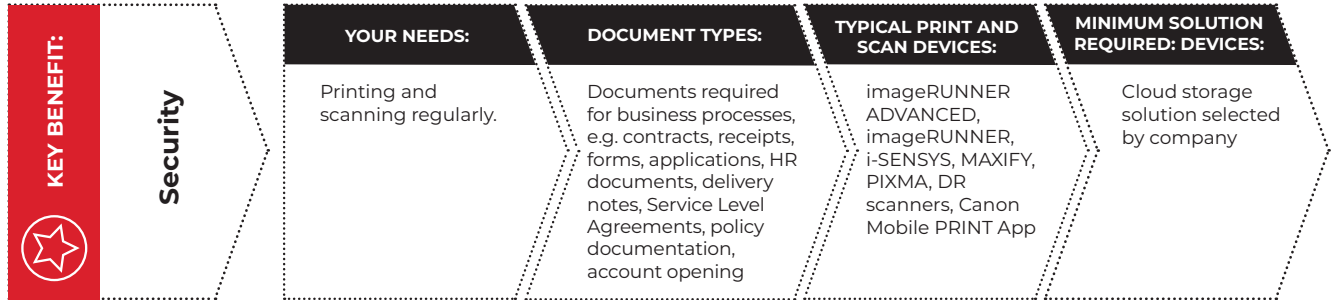

- HOW IT WORKS:**
1. Scan document at the device.
 2. Choose your email address as the destination.
 3. Open email, find scanned document as an email attachment.
 4. Rename the document and/or forward to colleagues.

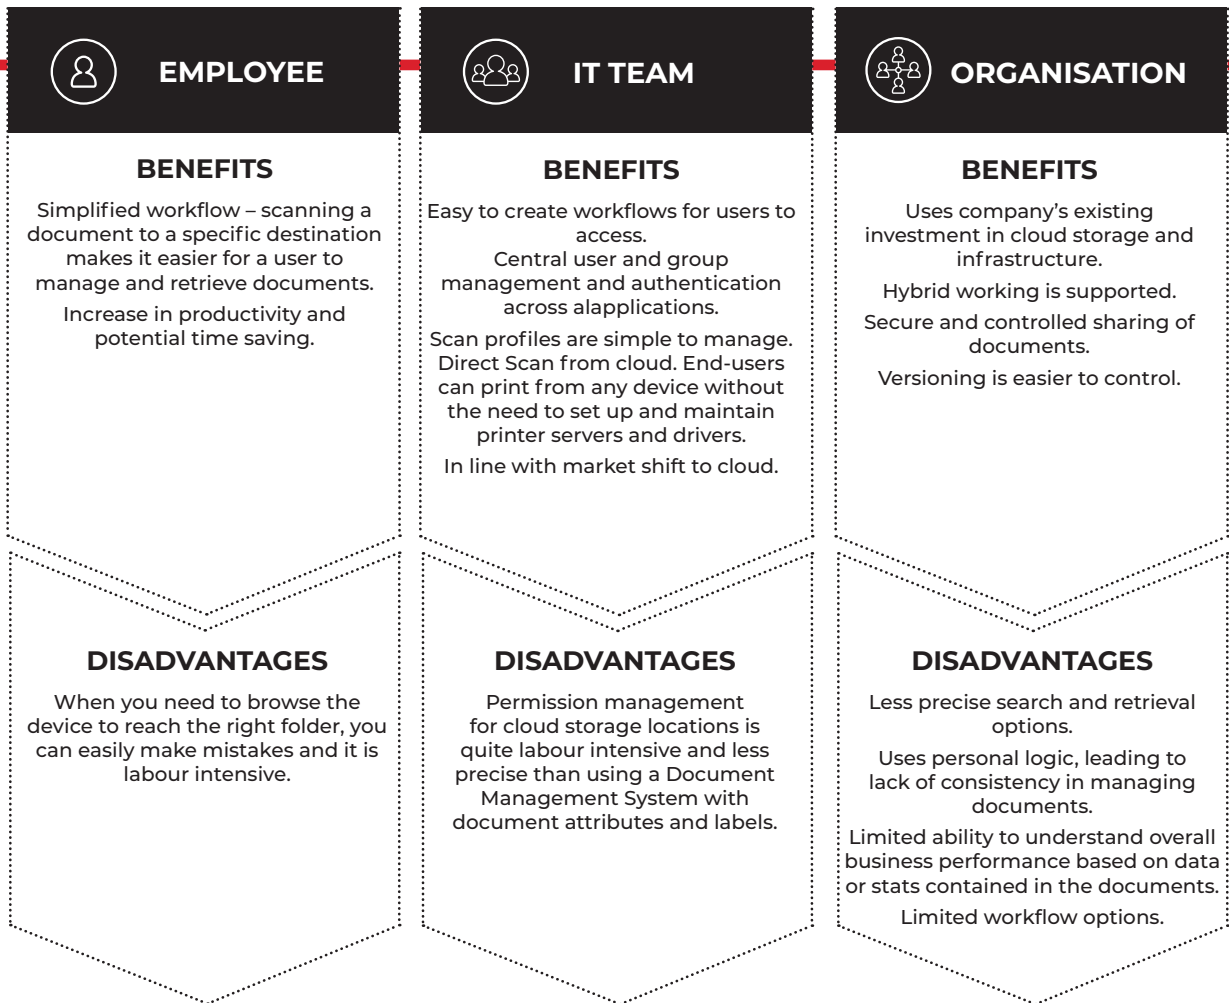

SCAN TO CLOUD STORAGE

I need to scan paper documents directly into cloud storage.

- HOW IT WORKS:**
1. Scan at device.
 2. Select cloud storage location, such as OneDrive, Google Drive, or Dropbox, as the destination.
 3. Document automatically saved to selected location.

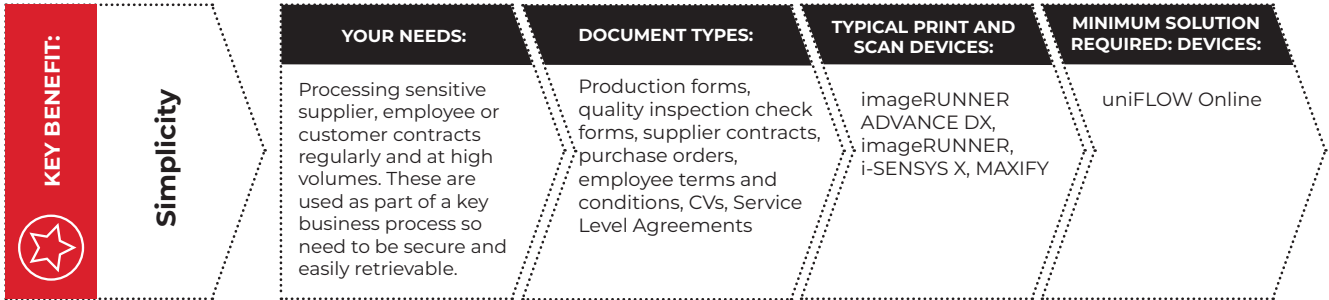

User productivity rating: ****
 Security and governance rating: **

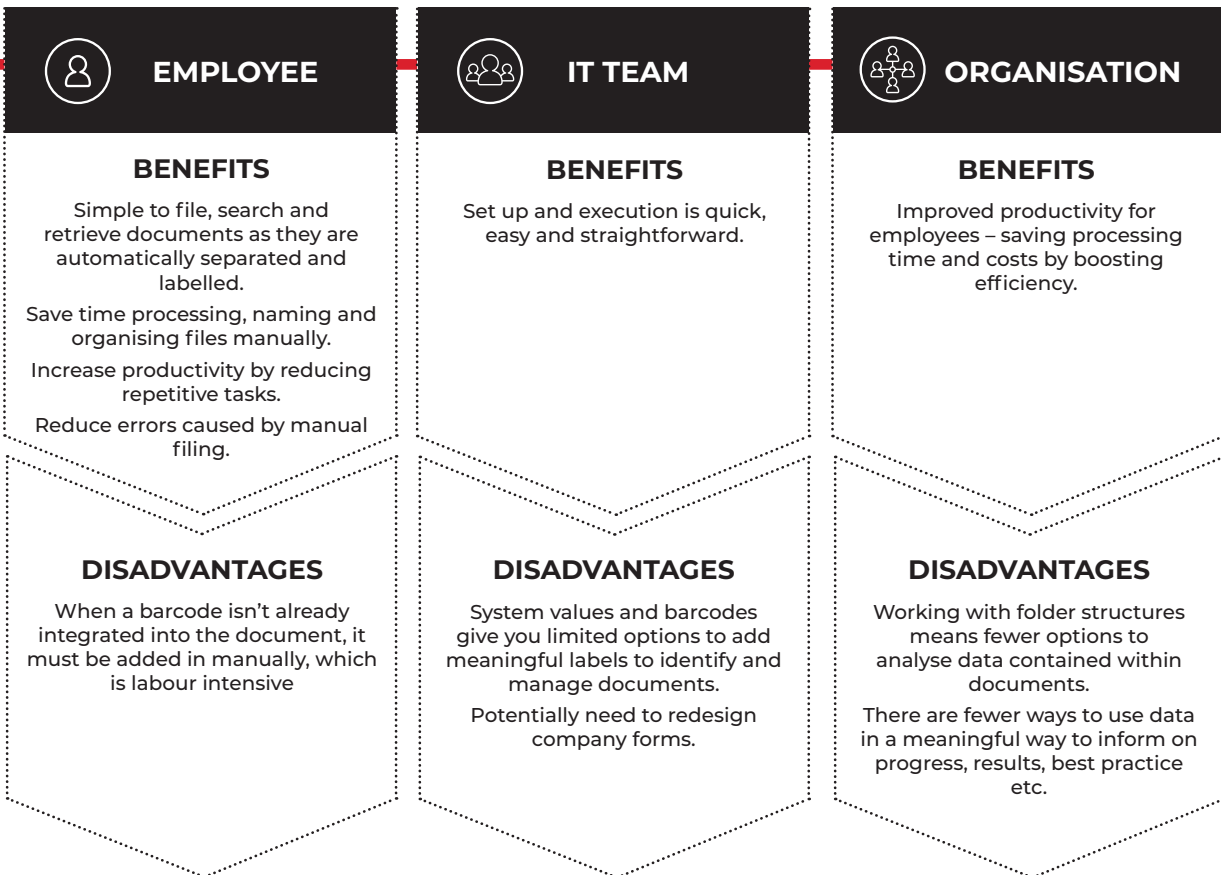

BATCH SCANNING

I regularly scan multiple documents of the same type at the same time.

- HOW IT WORKS:**
1. Log onto device and choose scan icon set up by IT to link to a preset cloud location, e.g. Scan to OneDrive Filing Assist.
 2. Scan multiple documents using ADF with one pass.
 3. Multiple pages separated into relevant individual documents in selected cloud storage location.

FILE ASSIST

Easily store, find and share documents by their content.

KEY BENEFIT: 	Automation	YOUR NEEDS: Carrying out standardised and repetitive business functions, e.g. collecting payments from customers or making payments to suppliers, processing structured and semi-structured documents such as response forms or quality inspection forms.	DOCUMENT TYPES: Documents required for business processes, such as contracts, invoices, applications, HR documents, purchase orders, expenses, quality inspection forms	TYPICAL PRINT AND SCAN DEVICES: Home: Inkjet device Office: Canon imageRUNNER ADVANCE DX, imageRUNNER or i-SENSYS X	MINIMUM SOLUTION REQUIRED: DEVICES: uniFLOW Online

- HOW IT WORKS:**
1. Scan selected documents for a given business process at the device.
 2. Use Filing Assist at desktop, validating key data such as PO number, invoice reference, customer name, etc., and saving to selected cloud storage location.
 3. Document filed and indexed based on the data it contains, ready for further processing.

EMPLOYEE	IT TEAM	ORGANISATION
BENEFITS Using File Assist makes scanning and indexing documents interactive and engaging by reducing repetitive tasks. Simple to file, search and retrieve documents as they are automatically separated, named and indexed (labelled) as needed. Reducing errors by minimising manual filing.	BENEFITS Set up and execution is quick, easy and straightforward. Reduce need for print servers.	BENEFITS Documents are archived with meaningful index values, creating more options for document security and increasing compliance. Making processes more efficient improves employee engagement due to improved processes and less repetitive manual tasks.
DISADVANTAGES Indexing documents can take more time initially but saves time due to workflow automation and improved search and retrieval options.	DISADVANTAGES N/A	DISADVANTAGES N/A
