DR-M1060II

ROBUST AND RELIABLE A3 SCANNER

A3 Departmental Scanner

With its versatile A3 document feeder and uniquely compact design, the imageFORMULA DR-M1060II is perfect for reliably scanning various document types, while keeping the footprint low – making it ideal for offices that need A3 scanning but are limited by space.

Unique space-saving design

The DR-M1060II is a uniquely compact A3 scanner – ideal in corporate office departments or decentralised branch offices that have limited desktop space but require A3 scanning. Users will appreciate the comfortable and convenient operation of the front document feed and exit design, especially when handling A3 size documents.

ROBUST AND FLEXIBLE A3 SCANNER THAT TAKES UP LESS SPACE

Exceptional image processing quality

Enjoy perfect image results with the DR-M1060II's host of advanced image processing features, such as Advanced Text Enhancement that produces clear legible images even from faint text originals. Additional features like Auto Colour Detection, Auto Size and Deskew Correction, Text Orientation Correction and Customised Colour Dropout further enhance image quality and consistency.

High-performance scanning, built to last

Despite its compact design, the DR-M1060II is robustly built for handling high-volume workloads of up to 13,000 documents a day. It is extremely productive with ultra-fast duplex scanning speeds of up to 120 ipm (A4) and a 80-sheet document feeder – ideal for fast-paced business environments.
Ultra-smart, ultra-efficient handling

With skew detection, and ultrasonic double feed detection, the DR-M1060II reduces errors and saves time when scanning.

A convenient Double Feed Release (DFR) feature allows you to quickly 'ignore and continue' scanning in special cases where a double feed has been incorrectly detected, such as when scanning an envelope or a document with a sticky note. Users can save time by conveniently separating batches of documents automatically using a blank page separator sheet.

Reliable and versatile paper handling

The DR-M1060II offers maximum document handling flexibility, allowing users to choose between two feeding mechanisms, U-turn Paper Path as default and Straight Path when Straight Path Tray is open. With a robust feeder mechanism it's easy to scan a variety of media types, including embossed / plastic cards, thick and thin media – and up to 3m long documents. Users also have the ability to scan A1 size documents using the folio mode feature whenever they need it.
