DIGITAL TRANSFORMATION SERVICES FROM CANON

**Seamlessly integrating paper & digital
with technology, solutions and services**

Canon

YOUR DIGITAL TRANSFORMATION JOURNEY

While many businesses are looking to accelerate their digital transformation journeys, in reality, most still operate within hybrid – digital and paper-based – environments. This journey to digitisation is continuously driven by stringent information management and security regulations, mobility and process automation needs and by demand for faster adoption of cloud and managed services.

Canon's Digital Transformation Services support your journey by integrating paper and digital, using combined print and information management services delivered on-site, via the cloud or in a mixed environment.

WHAT'S IN IT?

Canon's Digital Transformation Services offer hardware and software designed to help companies achieve enhanced productivity, collaboration, security, compliance and sustainability goals.

By combining Managed Print Services and Workspace Collaboration Solutions, Canon supports your digital transformation journey, helping you gain transparency and control over the entire document lifecycle and related processes.

Regardless of where you're working, Canon offers a flexible and effective approach, providing bespoke solutions that enable you to manage everything from access and storage, to printing and distribution.

"PRINT AND DIGITAL CONVERGENCE IN THE FUTURE MOBILE WORKPLACE WILL DEMAND MORE EFFECTIVE COLLABORATION AND COMMUNICATION".

(Quocirca Print 2025 Report)

Managed Print Services
Canon's solutions and services help you maintain an **optimised, secure and sustainable print infrastructure** - enabling you to focus on your core business. Available through the cloud, on-site and set-ups combining both.

- Combine Canon's industry leading technologies, services and expertise to deliver end-to-end print optimisation with hardware and software support

Workspace Collaboration
A comprehensive, scalable and flexible suite of solutions that **optimises content and document management, streamlining complex business processes.**

- Pre-integrated cloud connectivity solutions enable secure, efficient scan and print from a variety of cloud storage services including Google Drive, OneDrive and Dropbox for frictionless remote collaboration

- Advanced capture solutions offer pre-integrated connectivity to cloud business applications with automated data capture and indexing

- Process automation for end-to-end content management and maximum workflow efficiency

WHY CANON DIGITAL TRANSFORMATION SERVICES

Canon is a trusted partner for your digital transformation, offering innovation and expertise to help make your journey a success.

Canon's hardware, software and services improve paper and digital integration, bringing digital and manual processes together seamlessly. Combining print & information management delivers a complete technology ecosystem.

Improve collaboration and mobility
Solutions that optimise collaboration and remote working, from mobile printing and scanning to digital workflows.

Strengthen information security
Secure by design; helping you to preserve data and information security, meet regulatory compliance and maintain business continuity.

Drive productivity
Powered by an efficient, sustainable and future-proof print infrastructure with the value add of automation, advanced capture and cloud connectivity.

Enhance customer experience
A 'hybrid' approach to digital transformation for a smooth journey through simplified printing and scanning, personalisation, multi-channel delivery and process control.
