PAY ONLY FOR WHAT YOU PRINT

Canon's imagePROGRAF eService is a unique, cost effective new service that guarantees peace of mind with a complete 'Managed Print Service' that eliminates hidden costs and maximizes productivity.

Why eService?

Typically, in such environment the large format printers are a key technology supporting the day to day functionality of the business. However, since the print is not 'sold', it is a pure cost to the business that must be minimized.

Offering Canon eService meant access to the latest technologies with the comfort of high levels of service and uptime.

Paying per print was very attractive to minimize ink tank stocks across their fleet of printers throughout the location.
