eSIGNATURE

A better way to sign documents
in a hybrid environment
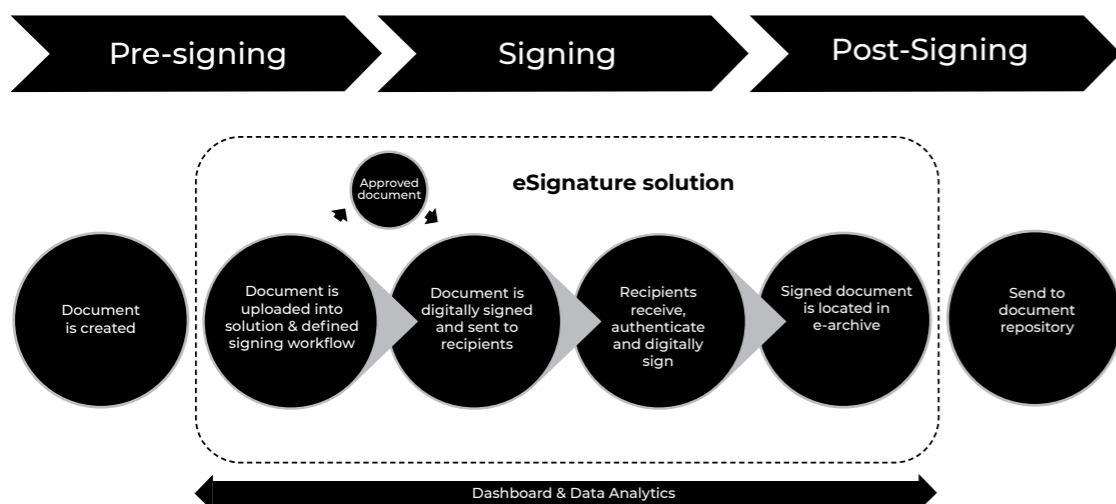

Canon

WHAT IS eSIGNATURE

The eSignature application enables you to electronically sign documents from any location – including legally binding contracts – via the easy-to-use web solution.

Using eSignature, you can electronically sign documents in different ways, from a 'basic' click to sign to an 'advanced' digital signature sealing the document and maintaining its integrity.

eSignature can be accessed from anywhere, improving customer experience & back-office productivity while maintaining compliance and security throughout the entire signing process.

HOW IT WORKS

Signing process with eSignature

Pre-signing | Signing | Post-Signing

eSignature solution

Approved document

Document is created

Document is uploaded into solution & defined signing workflow

Document is digitally signed and sent to recipients

Recipients receive, authenticate and digitally sign

Signed document is located in e-archive

Send to document repository

YOUR BENEFITS WITH eSIGNATURE

ENHANCE CUSTOMER EXPERIENCE

eSignature makes it fast and simple for your customers to access and sign documents wherever they are. Customers can sign documents using any device, from a home laptop to a smartphone or even a tablet in a retail store.

BOOST COLLABORATION AND MOBILITY

Access eSignature from anywhere in the world via the web-based solution, making it easy for teams to work together efficiently from different locations – particularly where important legal or financial documents such as supplier contracts or HR contracts are shared between different departments or geographies.

DRIVE PRODUCTIVITY

Eliminate manual processes such as physical printing and postage for important documents. Through integration, you can fully automate the pre- and post-signing processes as well.

STRENGTHEN SECURITY AND COMPLIANCE

Keep your information security tight and manage regulatory requirements. eSignature enables visibility and authentication throughout the signing process by following predefined signing workflows at the required level of security, covering the order of signature and method of authentication. The signed document can then be downloaded from the solution.

WHY eSIGNATURE WITH CANON?

A trusted partner

Partnering with Canon means embarking on a digital transformation journey with a globally trusted, innovative and financially stable company.

Document and process solutions experience

Canon has decades of experience with process engineering, and implementing and orchestrating solutions.

Easy to implement

Online solution and online workflows make eSignature simple and fast to deploy. Additional functionality is available to improve the user experience.

Multiple solution options

Canon consults closely with our clients to understand your business challenges. We select the appropriate software to solve these challenges and increase ROI.

A single partner

How many partners do you need to work with to manage all your content process solutions? Canon is a single provider of many integrated solutions, making life easier.
