

**SMALL TEAM,
LARGE
WORKLOADS?**

Meet the **i-SENSYS MF832Cdw**

Canon

INTRODUCTION

The last five years has seen a drastic change in the way we work, including increasingly cutting ties with a 'fixed location'. Driven by digital transformation, advances in connective technology and a greater trust in remote productivity, many companies have opted for a hybrid business model, allowing workers to move between locations depending on their needs.

More employees are working from home, but also some companies have decided to create smaller, more localised satellite branches, in addition to, or replacing a central office.

These changes have already led many business leaders to reevaluate their technology spending. Not only did companies need new types of technology and different capabilities, but investment had to be shared across more working locations to ensure they were equally effectively.

What businesses need, are devices which are built to facilitate shifting working patterns by helping teams to work efficiently and securely, regardless of where they're physically based.

Meanwhile, from a practical standpoint, there has been an increase in demand for smaller format devices which support local hub teams, smaller workspaces and decreased on-site team sizes. At Canon, we've been developing **next generation devices** which support these needs and give your business the tools to support successful hybrid workspaces.

INTRODUCING THE i-SENSYS MF832Cdw

i-SENSYS MF832Cdw

The new, top of the range colour i-SENSYS model, harnessing the award-winning imageRUNNER ADVANCE technology, to bring faster speeds, new media formats and better security to small, but busy workspaces.

SMALL TEAM, BIG DEMAND

The i-SENSYS MF832Cdw has been designed to support smaller working groups with high demand printing and scanning.

Whether you're a small business or a satellite branch, if you have a busy team of up to 12 people, the i-SENSYS MF832Cdw can act as your hub device, helping you get through your workload quickly and securely.

QUICK FACTS:

What's new to the i-SENSYS multifunction colour range?

FASTER

- **38ppm print** / copy speed
- Scan speeds of up to **150ipm**

LARGER

- **7"/17.8cm touch screen** in range with more intuitive design
- Max paper capacity of **2,300 Sheets**

NEW FEATURES

- **A6** media support
- McAfee **Embedded Control**
- **Dual wired** networks

NO FUSS EFFICIENCY

Not every business has IT support on site, particularly if you are a local team without the head office resources, so the i-SENSYS MF832Cdw has been designed to keep your teams working efficiently, with as little support needed as possible.

Easy to use and easy to maintain, the device is ideal for organisations who need to operate independently.

FEATURES

Large 7 inch/17.8 cm touchscreen display with more intuitive, keyless design

Teams spend less time trying to find the functions they need and can get work done faster

High paper capacity of 2,300 sheets with trays for multiple media types

Reduce the need to refill the paper tray, or swapping the media type, allowing teams to keep working productively

Universal Print by Microsoft support

Native compatibility with Universal Print ensures that your IT team can centrally manage and maintain the device through the cloud, without needing to be onsite

Improved timeline memory

Users can repeat previous print and scan settings at the touch of a button, instead of having to re-enter them for frequent jobs

All-in-one cartridge

Easier to change, without IT support

THE DETAILS

The fastest multi-function colour device in the range

GETTING WORK DONE FASTER

The i-SENSYS MF832Cdw is the fastest multi-function colour device in the range, supporting high volume printing and scanning across a variety of media formats.

FLEXIBLE CONNECTIVITY

Inbuilt iOS connectivity and dual network support provide a range of flexible options for interacting with your device.

FEATURES

Dual wired networks

Allows connection to an additional wired network, helping you to work safely in a shared environment

Canon PRINT Business app

Allow users to easily print documents or scan to cloud storage services including Google Drive and Dropbox from their mobile phone or tablet, while minimising physical interaction with the device

FEATURES

Up to 38 colour pages per minute

Shorter print queues in a shared working environment

One pass duplex scanning at speeds of up to 150ipm

Faster than ever duplex scanning to allow workers to digitise documents and send them to the cloud

A6 media support

Enables businesses to print new types of document and makes the i-SENSYS MF832Cdw suitable for new industry applications including medical prescriptions

ROBUST SECURITY

The latest security features provide device, network and data protection to keep your workspace secure. The device is equipped with a range of security features that make it ideal even for high-security functions such as banking, healthcare and finance, as well as shared workspaces.

McAfee Embedded Control continuously monitors for threats, and the addition of a range of administrator controls helps control device access, manage permissions and protect secure print functionality.

FEATURES

McAfee Embedded Control

Ensures your device is always protected from malware and firmware modifications

Verify system at start-up

Prevents any unauthorised firmware changes when the device is activated

User authentication

Ensures documents are released only to the right user, ensuring protection for your sensitive documents, even in a shared workspace

Force hold print

Prevents unattended documents being left on the device and exposed to unauthorised people

CONFIGURATION OPTIONS

The i-SENSYS MF832Cdw offers a range of configuration options which provide the flexibility to adapt to your business's needs.

Additional Paper Cassettes

An additional three paper cassettes can be added to increase paper capacity and boost media flexibility

Pedestal Base Units

Two types of wheeled pedestal can be attached to the base to make transport easier in full configuration, as well as making it sturdier.

SMALL FOOTPRINT, BIG IMPACT

The new, i-SENSYS MF832Cdw harnesses cutting-edge imageRUNNER ADVANCE technology, in a compact format, delivering fast, efficient print and scan.

The ideal hub device for a busy team in a small business, shared workspace or local branch, the i-SENSYS MF832Cdw is productive, secure and low maintenance.
