KEEP YOUR BUSINESS SECURE, AROUND THE CLOCK

The machine learning AI-trained firmware at the heart of imageFORCE premium devices provides the best security settings for your environment and detects any changes, helping you safeguard your data and remain compliant with evolving regulations. It also helps to minimise security vulnerabilities due to missed settings – perfect for organisations with limited IT expertise.

OUR SECURE BY DESIGN ARCHITECTURE ENSURES 360° PROTECTION

with standard features such as TPM 2.0 data encryption offering a wide range of security capabilities to protect your information at rest and in transit.

EVERY imageFORCE PRINTER INCLUDES TRELLIX

embedded control to defend against malware.

STAY PRODUCTIVE

Canon imageFORCE printers keep your data locked down, safe and secure but without limiting the pace your information needs to flow through your business.

By using Cloud Connector or uniFLOW Online, our devices let you securely scan your paper documents straight into your cloud-based workflows, smoothly slotting into solutions such as Microsoft Teams and Google Workspace.

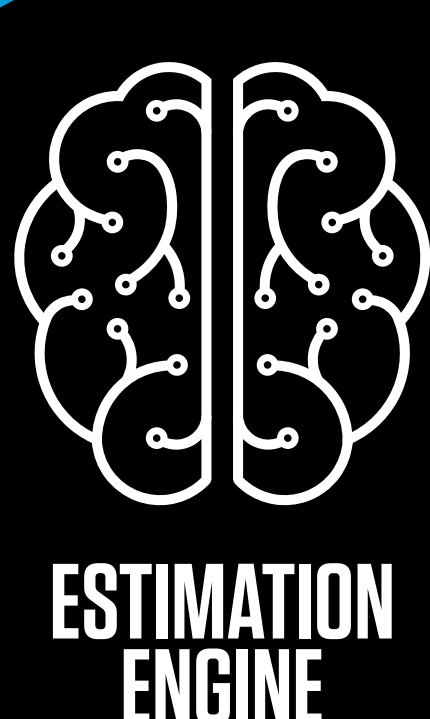

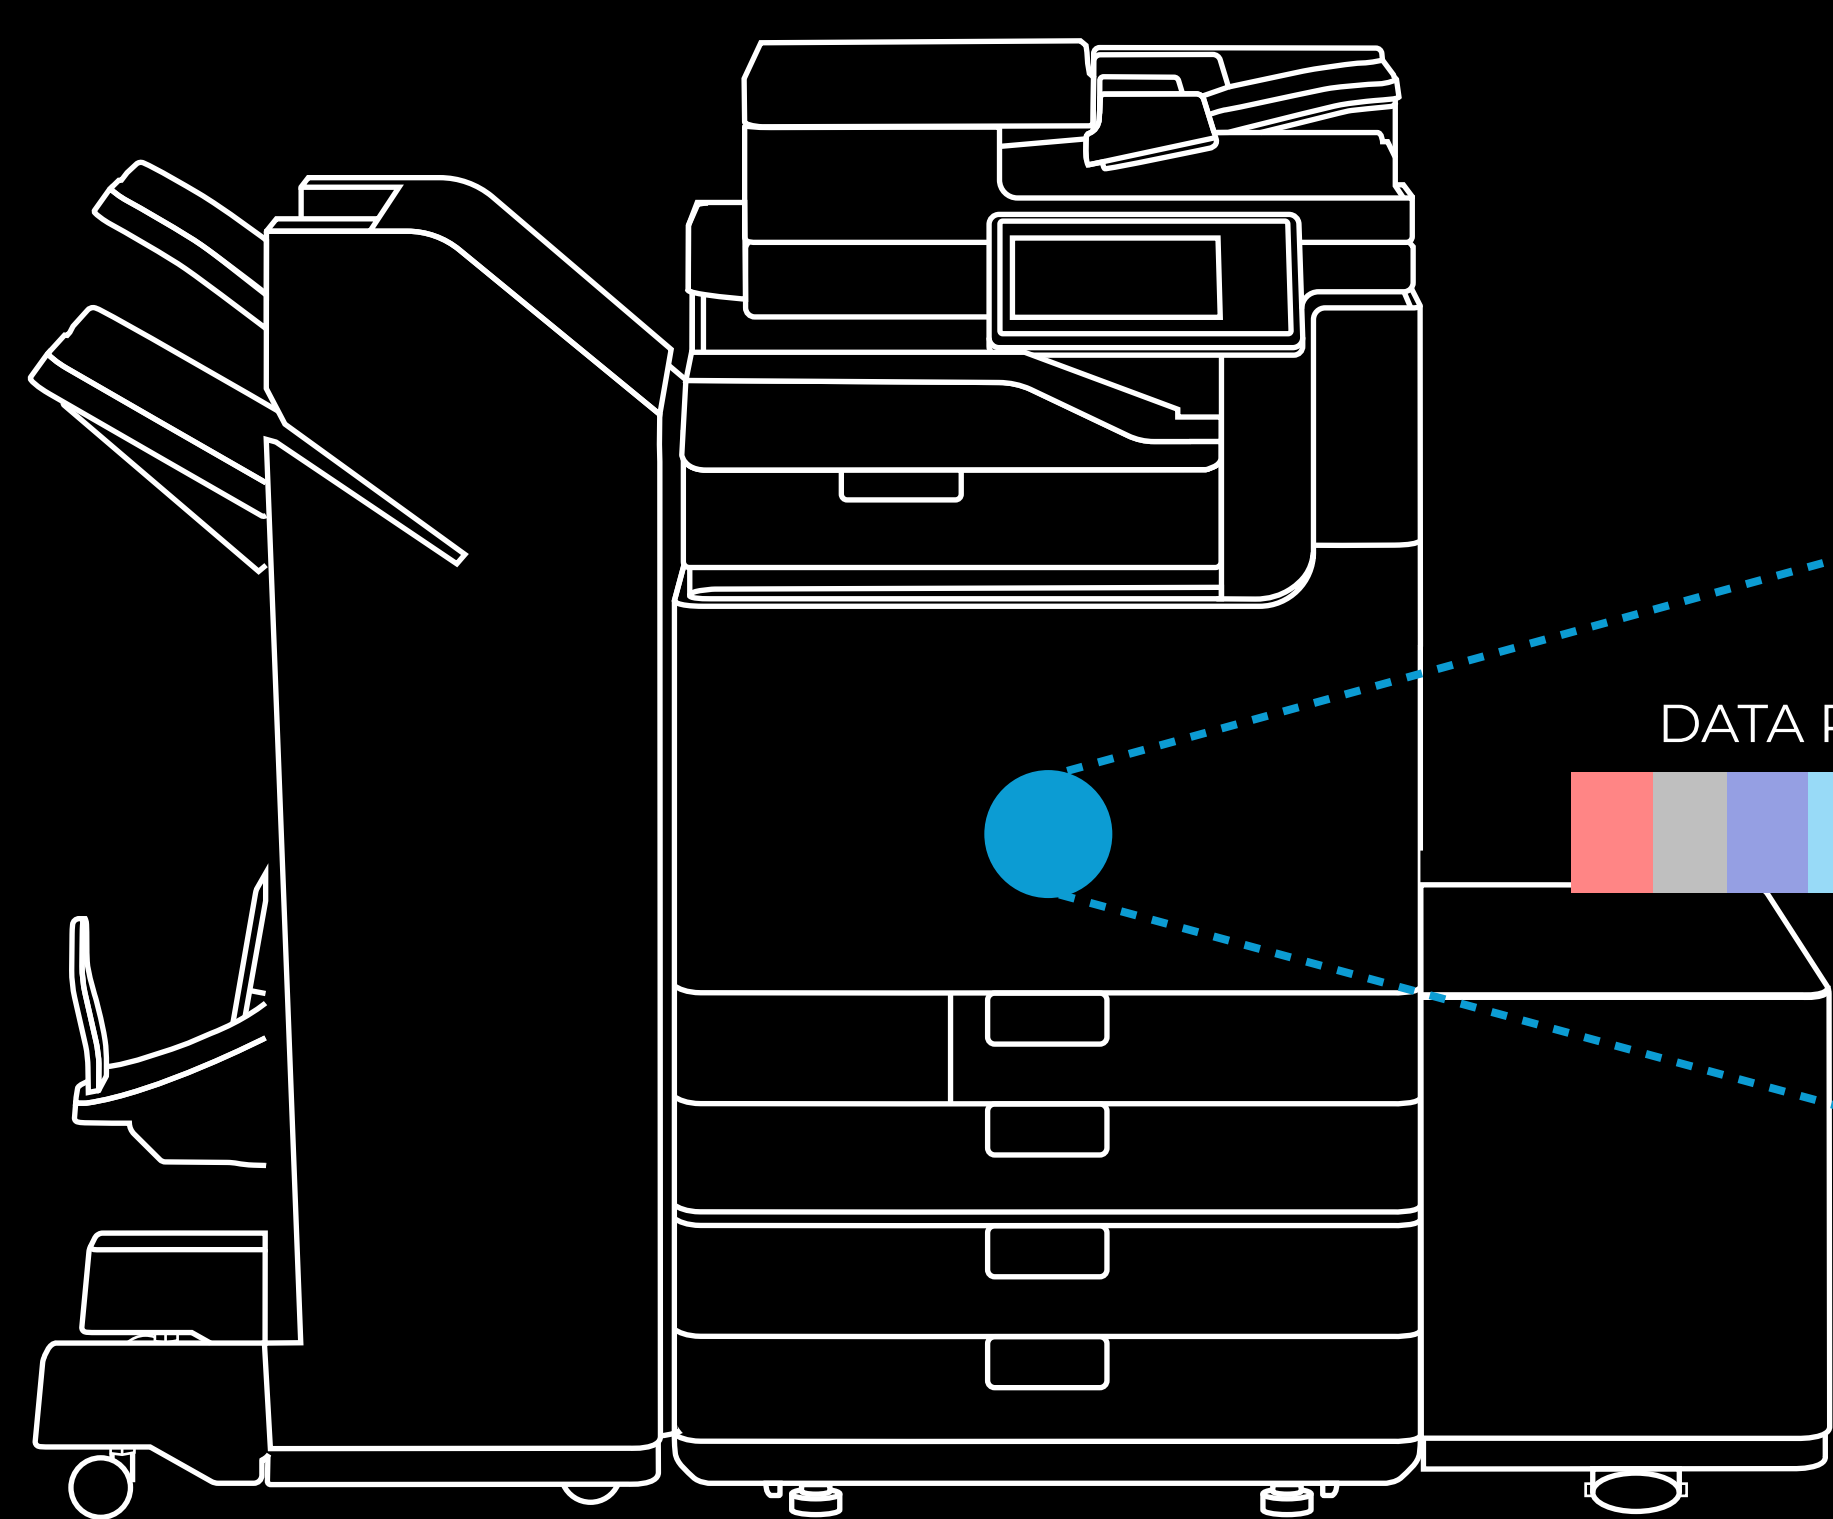

The support for cloud-based identity and access management solutions help you work seamlessly across Microsoft services such as Microsoft 365 and other 3rd party services.

WITH imageFORCE, SECURITY AND PERFORMANCE GO HAND-IN-HAND

thanks to intelligent, machine learning AI trained firmware.

Flagship imageFORCE devices use the security environment estimation engine to analyse the network environment and recommend up to or over 100 security settings to be applied by a touch of the button, making it easy to secure your print infrastructure.
