## Efficient production at your fingertips

Pressure to raise productivity and safeguard margins means many businesses are looking to manage print performance more holistically. By using real-time data in clear tables and charts, they can analyse their print portfolios quickly and identify the most profitable actions.

Take control of your print operation with PRISMAlytics Dashboard, an easy and secure cloud-based management information tool that provides comprehensive overviews for a variety of Canon printers.

### FEATURES

#### KPI dashboard

Collects all KPI data and displays this information in a periodic dashboard showing activities and consumables for relevant printers.

#### One dashboard for multiple Canon devices and different print controllers

PRISMAlytics Dashboard provides insights and comparisons on the activities of different Canon products (such as the imagePROGRAF, imagePRESS, ColorStream and ProStream series) and DFEs (such as Canon PRISMAsync, PDL and Fiery®).

#### Export data externally

The open interface lets you export and copy usage data for a defined period (per day, per week or per month) in CSV files, for further processing in other Management Information Systems.

#### Actionable data

Explore specific details of printer activity and consumables to easily optimise your operation.

# Maximise productivity with PRISMAlytics Dashboard

#### Understand your fleet at a glance

PRISMAlytics Dashboard is easy to use and presents your data in clear graphs and charts, helping you optimise your print performance quickly.

#### Analyse your entire Canon print portfolio in one place

PRISMAlytics Dashboard brings together data from a wide combination of Canon's printers, whether that's large format, web-fed or sheet-fed toner/inkjet devices. You can also use your controller of choice, including PRISMAsync, Canon PDL and others, allowing you to compare performance across your fleet in one single solution.

#### Use your data wherever you need it

Collect production data and visualise it instantly. Data can be exported as a CSV file, allowing further use in other management applications and reports.

#### Get more detailed data with PRISMAsync

PRISMAlytics Dashboard is fully integrated with PRISMAsync driven Canon devices collecting detailed data from the heart of your Canon printers via the Rich Data Capture tool. Compared to other DFEs, you'll gain access to a wider set of fully detailed data points from across your fleet.

## Supercharge your print operation

### PRISMAlytics Dashboard supports every area of a print business:

#### Site Administration

Keep track of usage and consumables to understand potential efficiency gains.

#### Print Floor Operation

Monitor every critical aspect of the print operation to maximise productivity.

#### Organisation and Leadership

Record and analyse Key Performance Indicators (KPIs) across the business to drive better strategic decision making.
