COMPLEX TECHNICAL DRAWINGS MADE EASY

If you work with technical drawings and related documents, you are constantly looking for an easy way to print them accurately. You would like to avoid inefficient production or the need to create multiple test prints. As a print user, it's important to be able to prepare, submit and access print jobs in a convenient and secure way.

Increase workflow productivity

With easy job configuration and print preview, PRISMAproduce Tech helps you print your complex technical documents quickly and in high quality. Prepare and submit your technical drawings in an easy way and ensure first time right printing to your desired printers.

Standardise your workflow

Standardise your repetitive print jobs and enhance your workflow by creating dedicated templates with the preferred print settings for your applications. Easily save your print settings to help to accelerate your print preparation and increase work efficiency, in just a few clicks.

Save operator time & effort

Switch between printers quickly without having to close and restart the workflow application. With the improved drag & drop functionality you can save even more time in print preparation.

PRISMAproduce Tech

is a powerful workflow application and a user-friendly way to create document sets of dozens of files and submit them easily to your plotWAVE, colorWAVE and a selection of imagePROGRAF printers.

- ➔ An **easy-to-use** workflow application built on our years of expertise in developing large-format technical document plotters, printers, copy and scan systems.
- ➔ With the new, easy-to-use server concept you can **submit print jobs to up to 50 connected printers** from a browser on any computer in your network.
- ➔ Benefit from a **more consistent print process** with more reliable print quality, using dedicated templates and with a more easy IT maintenance.

ENJOY UNBOUND JOB SUBMISSION

As a producer of technical drawings and designs you want an integrated, easy-to-operate solution. Based on years of expertise PRISMAproduce Tech has been developed for users in architecture, engineering, construction and manufacturing companies and professional print shops handling larger sets of technical documents.

Printing accuracy and reliability

- High accuracy in print jobs
- Advanced algorithms for increased reliability
- Automated pre-flight checks to reduce misprints
- What-You-See-Is-What-You-Print (WYSIWYP) previews
- Instant warnings for low toner or ink levels, or empty media rolls

Template and media management

- Standardised workflows through dedicated templates
- Easy creation and use of templates
- Print preview and status updates

Integrated workflow

PRISMAproduce Tech enables increased workflow productivity, integrated to the plotWAVE and colorWAVE T-series printers to prepare technical drawings and designs more easy as before.

Workflow and productivity

- Quick job creation and workflow standardisation through easy-to-use templates for complex documents
- Real-time monitoring of job status
- Fast printer switching without needing to restart the application
- Drag & drop functionality for print preparation
- Automatic discovery of printers

Compatibility and scalability

- Capacity to connect up to 50 connected printers to the network and serve 50 user connections simultaneously
- Monitoring of media, ink, and toner availability
- Deployment on a single server, accessible throughout the network

User experience and accessibility

- Server-based solution accessible from any computer within the network
- High-quality previews with zoom functionality and preview warnings
- Send print jobs to up to 50 connected plotWAVE, colorWAVE and imagePROGRAF printers
- Job submission from any device with a browser and network connection
- Personalised client environment for increased security and convenience

YOUR PERSONAL PRINT ENVIRONMENT

Constant feedback on printer status, media, and ink/toner availability. Operator warning when toner/ink are low or remaining media

Remote ON function to help ensure the colorWAVE or plotWAVE is ready when you arrive at the printer.

Create & use Hot Folders for standardized print jobs

Up to 50 connected printers supported in one server application

Job Queue provides possibility to reprint, duplicate, edit or save jobs

Drag and drop documents from one printer to another

Predictable dynamic and instant **'What-You-See-Is-What-You-Print'** preview **Zoom in and out** using the Enlarged preview functionality to check details before you print

PRISMA
produce Tech

Drag and drop documents on the media templates to apply individual or grouped job settings

Easily crop your PDF files to save time and avoid wasting media

Print Assistant for automatic optimal print mode settings and Automatic legend detection.

Icon driven job setting options: media, layout, quality, finishing, production settings

Create & use Templates for frequently used job settings

Browser based user experience
Easy server installation with the Connect Assistant & Automatic printer discovery supporting up to 50 connected plotWAVE, colorWAVE and imagePROGRAF printers

SOLID JOB SUBMISSION YEARS AHEAD

PRISMAproduce Tech provides a flexible and user-friendly workflow solution with a personalised user environment. Building on years of expertise our workflow concept connects multiple process steps in a smart way.

Years of expertise

Canon is a well-known developer of controllers and workflow software that gives architects, designers and engineers the tools they need to do the job.

Based on more than a decade of market-leading success, we designed this workflow solution with the focus on the users and their needs - for solid productivity, instant operation and reliable performance.

We further developed an ecosystem in which printers, workflow applications and tools integrate into a more smooth process. This gives architects, designers and engineers the power they need to do the job.

Easy-to-use server concept

PRISMAproduce Tech is a powerful and user-friendly workflow solution that helps increase the accuracy and convenience in technical document printing. It helps you to prepare and print complex documents quickly, with high-quality previews.

This server-based workflow application provides a more consistent print process with more reliable print quality.

Your personal print environment

PRISMAproduce Tech provides every user with a personal environment. That means you benefit from increased security and convenience: you log in to a password-protected environment to gain access to dedicated templates and hot folders.

Via this personal PRISMAproduce Tech environment, print users can work from different devices within the network.

PRISMAproduce Tech has an intuitive user interface with the recognisable PRISMA look-and-feel, providing an easy, smooth work experience.

STREAMLINED WORKFLOW YEARS AHEAD

PRISMAproduce Tech is part of the PRISMA Tech Suite. The PRISMA Tech Suite is a set of software solutions that helps customers in the market of large format technical drawings and designs to streamline their workflow in an easy way and to stay in control of their print operations.

Build on proven heritage

The PRISMA Tech Suite is developed based on years of expertise in the architecture, engineering and construction community, and helps customers to stay years ahead.

Print users benefit from solid job preparation and increased productivity with a powerful workflow application designed to help with their day-to-day print operations.

The selected printer tools are designed and tailored to optimize the performance of a diverse range of Canon printers.

PRISMA Tech Suite

Create breathtaking applications while staying in control of your printer, with a powerful workflow application and printer tools that are designed to help you with your day-to-day print operations.

PRISMAproduce Tech

Compose, manage and submit complex sets of documents from your web browser to one or more printers at a time.

PRISMAlytics Dashboard

Get comprehensive overviews to monitor and maximise the production of your print operations with this secure cloud-based management information tool.

PRISMAlytics Accounting

Capture data for cost charging and usage monitoring with this cloud-based reporting tool.

PRISMAservice

Maximise your uptime with a central platform for all service activities. Provide faster, more efficient and more effective customer support. For Canon's Service and Support organisations and servicing partners.
