INFORMATION SECURITY WITH CANON
BUSINESS SOFTWARE

Protection of sensitive data to help you enhance security and compliance throughout the entire document lifecycle - whether in paper or in digital format. Canon business software safeguards your documents and content when you print and manage your fleet, scan and capture information, manage and share digital files, or when processing and distributing business critical communications.

SOLUTIONS	FEATURES	BENEFITS
Print and Device Management Software	Encryption of print data in transit	Securely manage devices and print policies to avoid theft of intellectual property or confidential documents during print processes
	Secure print job release (on premise or via the cloud) from any device, including secure guest printing	
	Restricted access to device functionality for specific users, groups or departments	
Scan and Data Capture Software	Secure cloud-based document capture with user authentication	Utilise automation and intelligence to reduce human errors and enhance document security and compliance related to scan and data capture processes
	Secure distribution of digitised documents to selected destinations	
	User authentication for access to assigned capture workflows	
	In-process encrypted data	
Content and Process Management Software	Secure, encrypted storage	Boost digital transformation while increasing the security of your content management workflows and business processes
	Configurable access controls and retention rules	
	Secure document access for remote workers	
	Industry-Leading Authentication and User Management (Microsoft AD)	
Communications Management Software	Process visibility with track and trace capabilities for distributed documents	Improve the compliance and security of your customer communications with better control of document composition and distribution related processes
	Proof of delivery through robust document delivery processes	

SECURE YOUR INFORMATION ACROSS THE DOCUMENT LIFECYCLE, FROM ANYWHERE

Print is challenging for security and compliance, as it's difficult to have complete **visibility of user or document activity,** this can result in data breaches

Outgoing communications, documents and data need to be managed securely to avoid **information compliance issues**

BUSINESS PROCESS

- MANAGE PRINT & DEVICES
- CAPTURE INFORMATION
- PROCESS CONTENT
- COMMUNICATE

Scanned documents containing sensitive details should reach their desired destination securely.
User errors during manual data capture

Personal data and sensitive information of customers & employees needs to be **stored, processed & destroyed securely,** in compliance with data data privacy rules

- Office
- Coworking
- Work From Home
- Mobile Working
