

# DATA REMOVAL SERVICE

## Added protection for sensitive data in end-of-life print devices.

Changes to data protection regulations mean it is imperative to take control of how company and personal data is collected, processed and stored. This includes data residing in printers and multifunctional devices across your organisation.

### POTENTIAL THREATS TO YOUR BUSINESS

- Fines associated with data breaches and non compliance with strict regulations
- Negative effect on brand image and reputation in the event of a data breach
- Data stored in printers and devices is often overlooked
- Removing all data from redundant devices is labour intensive and could pose a risk if not carried out properly

### BUSINESS BENEFITS

- Reduce the risk of data breaches and associated fines with a professional, fully documented data removal service
- Extend internal data protection policies to cover your print devices
- Maintain compliance with certified evidence of each device processed
- Be confident that all sensitive data is removed beyond recovery

# DATA REMOVAL SERVICE

Canon Data Removal Service is designed to reduce the risk of data breaches by removing sensitive physical and digital data permanently from end-of-life Canon printers and devices.

1
