

ANTIMICROBIAL FILM FOR A SAFER WORKSPACE

Canon

THANKS TO INNOVATIONS IN VIRUS-FIGHTING TECHNOLOGY, YOU CAN USE YOUR CANON DEVICE WITH CONFIDENCE

This high-quality antimicrobial film provides protection against coronavirus and harmful bacteria for the life of the device, helping to maintain a safer and more hygienic working environment day after day

REQUIRES APPLICATION

The film pack¹ contains sheets designed to fit the device's **most common touch-points**:

AREAS APPLIED WITH FILM

Films contain silver ions encapsulated in a glass matrix and distributed evenly throughout the film.

FEATURES & BENEFITS

REDUCES HARMFUL BACTERIA AND VIRUSES BY 99.8%

The film helps to protect users from viruses such as coronavirus and other harmful bacteria that can exist on surfaces in typical workspaces. These include MRSA, Salmonella, E. coli and Listeria.

BOOSTS HYGIENE, SAVES TIME AND MONEY

The film provides extra protection and peace of mind. Excessive or improper cleaning can discolour and even damage the user interface. The film protects from cleaning fluids and helps to maintain standard cleaning practices.

LASTS UP TO FIVE YEARS

The film is designed to cover the contract life of the device. Once applied, use with confidence.

SAME GREAT DESIGN

We love how our products look, so have ensured this transparent film won't affect the sleek design of your device.

EASY TO USE ACROSS YOUR CANON FLEET

The film has been designed for use across the imageRUNNER ADVANCE DX portfolio, plus imagePRESS C170 Series and selected models of imageRUNNER ADVANCE, imageRUNNER, i-SENSYS and i-SENSYS X devices.

CONTRIBUTES TO SUSTAINABILITY

Canon is based on the philosophy of Kyosei, meaning living and working together for the common good. This includes improving sustainability; this film can reduce the reliance on cleaning wipes, the use of which has increased significantly.³
