

LESS CONTACT, MORE IMPACT:

SOLUTIONS FOR SAFER WORKING

Give your team the valuable peace of mind that their workspace – whether that’s the office, at home or at a co-working hub – is safe with our range of products, solutions and accessories.

Each is designed to function seamlessly with the Canon portfolio.

Canon

ESSENTIAL INNOVATIONS

FOR YOUR BUSINESS

Minimise physical contact with Canon devices while maximising efficiency, productivity, safety and security.

uniFLOW Online app

Subscribers to uniFLOW Online can download an app which makes it simple to submit print jobs from mobile devices, access personal activity reports, and view personal statistical information of each user's activities when they are logged in.¹ In addition, this technology can be connected to ID cards, allowing users to access and release a job simply by tapping their ID card at the device. As well as improving security, this means of authentication reduces the need to touch the display and the overall amount of time spent at the device.

Antimicrobial film

A high-quality, transparent film designed to prevent harmful microbes from spreading on surfaces. When applied to common touchpoints like device touchscreens and cassette units, it provides up to 99.8% protection against bacteria and viruses, including COVID-19,² for the contract life of the device without additional cleaning.

Canon PRINT Business app

Print, scan and send documents in the cloud from your smartphone or tablet with the Canon PRINT Business app.

An additional benefit for imageRUNNER ADVANCE DX portfolio and selected imageRUNNER models, the app's Remote Operation feature replicates the home interface of the device, allowing users to manage and process jobs as if they were standing in front of it.³

CONTROL, PERFORMANCE, CONFIDENCE

Take control! When working with physical documents in any workspace, useful office accessories reduce time, effort and contact with surfaces, supporting hybrid working and accelerating digital transformation.

Motion sensor

Standard across the imageRUNNER ADVANCE DX portfolio, this intelligent technology wakes the device from sleep mode as you approach.

Remote UI

Access and control the user interface of your device remotely through a web browser.

Instant stapler

A portable stapler operated by an automatic sensor with stapling of up to 50 sheets.

Instant staple remover

Remove staples from up to 30 pages with one single touch or via an optional footswitch.

CaptureOnTouch Mobile app

Scan directly from imageFORMULA scanners to your mobile device via Wi-Fi.

DIGITAL TRANSFORMATION SERVICES

Digital Transformation Services (DTS), bring together our leading Canon hardware and software into an integrated technology ecosystem, designed to support your transformation journey. These innovations are just part of our extensive range

of products and solutions developed to help create a safe, secure and welcoming working environment.

We can support your team for a confident and productive future.

Contact your local Canon office to learn more about the products and solutions that can help you create a safer and more comfortable workspace.

¹uniFLOW Online is optional and available as a Device Based Cloud Subscription for Document Output and Capture Management. It offers advanced benefits, including: Increased security with user authentication methods. Personalised workflows to enhance productivity. Reduced wastage by releasing jobs at the device. An intuitive cloud dashboard to leverage real-time data. Greater control over access and usage to reduce print costs. For more information please visit - <https://www.canon-europe.com/business/products/software/uniflow-online/>

² The antimicrobial film helps to protect users from viruses such as COVID-19 (tested under conditions defined by the ISO 21702 (2019) adapted protocol for contact times of 15 and 60 minutes on the human coronavirus HCoV-229E) and other harmful bacteria including MRSA, Salmonella, E. coli and Listeria.

³ The Canon PRINT Business app is available on the Apple App Store and the Google Play Store for Android.
